The Louisville Market.

Total sales in this market last week were 4,925 bushels, against 3,500 bushels, for corresponding week of last year. Receipts were 2,493 bushels, against 2,962 bushels, for the same week of last year. Rejections were 580 bushels, against 474 bushels, for preceding week. Of the total sales last week 2,739 bushels were Barley and 1,365 were dark.

There is no "let-up" of the "boom" of the market. Notwithstanding the large increase, the market continues to trade well, and the price of wheat receives the most attention. In fact, this is the fruit belt of Kentucky, and thousands of barrels of the finest apples in the world are shipped from the little port of Concordia every season. At this time of the year the market is at its peak, and the great piles of wheat are largely stacked upon the wharf awaiting shipment.

In Concordia is situated the large fruit distillery of J. A. Barry, of this city, where hundreds of barrels of apple brandy are made every year. In addition to a large establishment within the port, there are the celebrated distilleries of W. B. Burch & Son, Mills Bros., Smith & Co., and Goss, Egart & Son, at Moseleyville, all of which turn out large quantities of good "apple juice" which is "churned" and made into jellies and jams. They are the "line and oil" of and-ant times.

These manufacturing establishments so conveniently situated give the farmer a ready and good market for all his fallen and refused fruit, and consequently the market is well supplied with all these hundreds of acres of fruit.

Some weathering rains have fallen in some parts of the state since last report, and in some places farmers report that the crop is considerably improved. The conviction is very general now, however, that no amount of rain will make any thing like a full crop. Conservative estimates are that the crop will be 50 to 75 per cent. of an average, with the probability of the quality being very poor.

They are to be used for front work a large and important public building.
